

When AI reaches its limits, a real person can help.

PeerBridge sits quietly in your browser. When you're searching for help with a real challenge, or your AI chat isn't resolving it. It suggests a peer who's already navigated the same situation.

- Works in the background, no new apps
- Suggests a peer at the right moment
- One tap to connect, zero friction

What are you working on?

A short description helps us match you with the right peers. Completely optional.

We only use your goal context to find peer matches, never to sell ads. No browsing data, no form values, no passwords ever leave your device.

Your current goal or challenge (optional)

e.g. Considering a career change from engineering to product management...
